CORE CAPABILITIES

ANALYTICS ENGINEERING

Transforms raw event, transaction, and API data into reliable metrics, feature tables, and decision-ready reporting.

CREDIT RISK INTELLIGENCE

Evaluates lending signals across approval/default outcomes with explainable metrics and portfolio monitoring.

DATA PRODUCT EXPERIENCES

Frames analytics work as persona-led products with clear workflows, business context, and product-ready outputs.

Technology: Python, SQL, Scrapy, Pandas, scikit-learn, XGBoost, PostgreSQL, MySQL, MongoDB interactions, FastAPI, ONNX, Docker, MLflow, Git

EXPERIENCE

Credeau Solutions Pvt. Ltd.

MobileForge - Device Intelligence API

Data Scientist - Lending Analytics & Feature Platform

Apr 2025 - Present

Noida, India

- Built and maintained transformation workflows for behavioral, transaction, and device data used in underwriting and portfolio monitoring.
- Built a B2B marketplace crawler workflow over 1,329 product records across Industrial Machinery, Raw Materials, Packaging, and Electrical Components.
- Operationalized lender-specific feature selection, custom WoE binning, SHAP reason codes, and feature documentation for repeatable rollout.
- Partnered with engineering on extraction-failure diagnosis, validation checks, monitored recovery, and reporting reliability.
- Supported real-time scoring via FastAPI/ONNX processing 10M+ SMS/day at sub-200ms latency.

DealerSoftPro

Associate Functional Consultant

Dec 2024 - Mar 2025

Remote, India

- Built automated ETL workflows and KPI dashboards across SAP modules, surfacing process bottlenecks and reducing operational delays 20% within the first 8 weeks.

GlobalLogic

Client: Google

Data Analyst

Jun 2021 - Apr 2022

Gurugram, India

- Analyzed 1M+ eCommerce records with SQL and Python and built Power BI dashboards that replaced 12 manual reports, saving 10+ hours weekly.
- Automated recurring reporting, cutting manual effort 30%, improving data accuracy, and training 2 analysts to independent delivery.
